Security Tokens Marketplace

ICO Max global investment and underwriting platform

ICO Max connects Initial Coin Offerings to more than a million potential investors

Investors want high quality ICOs and direct management of their money. Start-ups want a good field of prospective investors for their regulatory-compliant ICOs. Our automated, convenient, transparent, fully compliant platform connects them.

Our mobile app gives dynamic and well-visualized real-time information and analysis on start-up shares and prospects from the first day of their launch. Our data and marketing put start-ups' details in investors' hands worldwide and help them invest and trade in ICOs.

Services

The ICO Max platform is based in Canada and operates in compliance with all Canadian regulatory laws. It provides 5 services:

1. **Underwriting**: Legal due diligence and public disclosure documentation

2. **Valuation**: Comparative analysis and proper rating

3. **Global Exchange**: App-based pre-marketing, pre-filed KYCs, worldwide distribution

4. **Post-ICO Marketing**: App-based info supporting ongoing proper valuation

5. **Post-ICO Disclosure**: App-based quarterly summary reports and press releases

Platform Advantages

For investors, ICO Max provides underwriting of selected projects, investment insurance, dynamic and objective real-time analytics, verification of start-ups, legal support, and regulatory accreditation. Investors buy not ordinary tokens but securities that give them a voice in the start-up and its development.

For traders, ICO Max provides data and analytics to screen prospective start-ups, a platform to trade their tokens, information on closed sales with high discounts, pre-registration in ICOs, and legal support.

For start-ups, ICO Max provides global marketing to target investors from an ever-expanding base and solidify market valuation of shares (tokens) in the early stages of their work.

For bounty-members, ICO Max provides a referral system for selling tokens, with sales channels and a notification system, and commissions paid in promotions (tokens) of the projects being promoted.
